Projects

Loan Interest Calculation & Testing (Java, Junit)

- Wrote the logic for Interest calculations according to the project requirements & Specification
- Conducted Junit testing to verify and validate test cases (EP, BVA)
- Recorded all defects/errors

To view this project, visit: <https://github.com/abyss01701/CS341-Assignment-1>

Web development for personal ePortfolio website (in process)

- Developed website using HTML, CSS, JavaScript for frontend
- Implemented Node.js and MongoDB for backend file sending/retrieval

To view this project, visit: <https://abyss01701.github.io/main/>

Interactive Web Calculator

- Designed and developed a user-friendly calculator using HTML, CSS, and JavaScript, enabling users to perform basic arithmetic operations.
- Implemented features such as live input display, a functional backspace (delete), clear (AC) button, and evaluation of mathematical expressions using the eval() method.
- Integrated navigation elements like a back button and ensured compatibility across different devices with a responsive design.
